Storage POD Mini

Introduction

External hard disk drives have made it easy to back-up important data and move data from one machine to another but its performance was limited and always slower than an internal hard drive. Thanks to USB 3.0 and SSD technologies, it is now possible to create a USB storage solution that is smaller, lighter and more rugged than a traditional HDD. A blue anodized, all-aluminum enclosure enables this drive to be both lightweight and rugged yet measure a mere 110 x 68 x 10 mm (roughly the same size as an internal 2.5" HDD; without the enclosure) It fits easily in your pocket and requires no power adapter. It's the perfect travelling companion.

Features

- USB 3.0 + SSD technology - Unlock the true performance of your drive
- Portable – Compact, bus powered design
- Capacity – 60GB, 120GB, 240GB
- Compatible – Supports USB 3.0 & USB 2.0*

Specification

- Device : Storage POD Mini
- Interface : USB 3.0
- Dimensions (l x w x h) :110 x 68 x 10 mm
- Seq. Read/ Write: 260 MB/s, 174 MB/s
- Operating Systems supported : Windows 7, Vista, XP
  Mac OS X 10.4 or later (only USB 2.0 currently supported)
  Linux Kernel 2.6.31 or later
