

p/n: **W1066U_1G7**

Description

The W1066U_1G7 is an extreme performance 1GB DDR3-1066 DIMM module that supports 1066MHz+ clock speeds. It is ideal for gamers, power users and overclockers, and is perfectly suited for motherboards based on the new Intel P35 chipset.

This module has been tested and is guaranteed to operate at 1066MHz at 7-7-7-15 latencies at 1.8 volts.

This module is clad in our custom black cast aluminum high-efficiency (HE) heatspreader for optimum thermal performance. Efficient cooling is essential to optimize speed and to preserve the life of the DIMM.

This module is also available as a matched pair of 1GB modules (see p/n W1066UX2G7).

Module Features

- 240-pin DDR3 DIMM
- Non-ECC, Unbuffered
- 1GB module (128Mx64)
- DDR3-1066, 7-7-7-15 latencies
- W1066UA1G7
 - Single rank
 - 8 chips, 128Mx8
- W1066UB1G7
 - Dual rank
 - 16 chips, 64Mx8
- Cast aluminum high-efficiency (HE) heatspreader
- SPD*: DDR3-1066, 7-7-7-18 latencies
- Made in USA
- Super Talent Lifetime Warranty

Test Specs

These modules are tested and guaranteed to operate at these specs.

- DDR3-1066 / PC3-8500
- 7-7-7-15 Latencies (CAS, tRCD, tRP, tRAS)

Specifications subject to change without notice. You may achieve better or worse results depending on your other system components. All Overclock modules are tested with two modules installed; rated specs are not guaranteed for four modules in a system. *The Serial Presence Detect (SPD) on the module controls the timings at which the module will boot up when first plugged into your system. Super Talent selected conservative default settings to ensure that the modules will boot up in all motherboards. These settings can be changed in your BIOS setup. © Copyright 2007, Super Talent Technology. Revised 12 July 07.
