

■ ■ Performance Series DDR3

Dual Channel Kits

The Performance series is tuned for optimal latencies at extremely fast clock speeds on P55 based Core i5 or Core i7 systems. These modules are hand tested in the latest Core i7 motherboards in dual channel configuration to guarantee bone jarring performance. Each Performance series module is equipped with our advanced Chrome heatsink that is designed by our thermal engineers to wick away heat from the components more efficiently than traditional heatsinks, resulting in higher clock speeds. The Performance series is built expressly for extreme overclockers and gaming enthusiasts.

Ordering Information

WP160UX8G9	8GB DDR3-1600 CL9 Dual Channel Kit
------------	------------------------------------

Module Features

Chip Architecture	16 pcs 256Mx8 chip per DIMM
Ranks	Dual Rank
Module Architecture	512M x 64
Type	Non-ECC Unbuffered
Package	240-pin DDR3 DIMM
Heatsink	Hyper-efficient Chrome heatsink
Default latency in SPD	9-9-9-28
Warranty	Super Talent Lifetime Warranty

Test Specs

CPU	Core i7
Modules Installed	2 DIMMs only*
Vdimm	1.65V
Motherboard	Asus P7P55D Deluxe

	WP160
Clock Speed	800MHz
DDR Speed	DDR3-1600
Data Rate	PC3-12800

Test Latencies

Part Number	CAS - tRCD - tRP - tRAS
WP160UX4G9	9-9-9-28

© Copyright 2009, Super Talent Technology. Specifications subject to change without notice. You may achieve better or worse results depending on your other system components. All dual-channel overclock kits are tested with two modules installed; rated specs are not guaranteed for four modules in a system. Revised 14 Oct 09.
