Speed Series DDR3

Dual Channel Kits

Our Speed series is designed by hardware enthusiasts to reach top clock speeds with P55 based Core i5 or Core i7 systems. These modules are hand tested in the latest Core i7 motherboards in dual channel configuration to guarantee phenomenal speed. Each Speed series module is equipped with our advanced PX heatsink that is designed by our thermal engineers to wick away heat from the components more efficiently than traditional heatsinks, resulting in higher clock speeds. The Speed series is built expressly for extreme overclockers and gaming enthusiasts.
