## **Major Functions**

Brand new touch screen operating system, with enhanced display and convenient
 operation

- 320x240 dot matrix 260K-color (full color) high speed TFT display screen
- · Supports MP3, WMA and WAV music formats
- · Supports MPEG-4 (AVI) video format
- · FM radio with 20 preset channels
- · Supports picture browsing in JPEG, GIF and BMP formats
- · Built-in microphone and extra long time recording
- · Energy efficient setup, with automatic power off
- · Multiple EQ and cycle options
- · Supports multiple foreign languages
- · Supports WIN98S/ME, WIN2000 and WINXP systems
- · USB2.0 high-speed transmission
- · Supports e-book reading
- · Supports game functions
- · Mobile hard disk functions
- · Upgradable firmware

# **Basic Operation**

Power on

Push the power switch of the player towards different for 3 seconds to power on.

### Power off

While power is on, push the power switch of the player towards <sup>(1)</sup> for 3 seconds to power off.

### Lock button on/off

In video, music and radio modes, you can set the lock button to ON to prevent unintended button actions.

Button lock: Push the switch button of the player towards  $\square$ , and the buttons of the player will be locked with no response.

Button lock: Push the switch button of the player to the original position to unlock and restore button operation.

## Volume Control

In music, FM radio and video, etc, modes you can adjust the volume using + or - buttons at the lower part of the screen. Hold Button + or Button - to continuously increase or reduce volume.

## Switching the earphone/built-in speaker output

In the button menu, short press  $\leq$  button to switch the sound output between the earphone and built-in speaker.

### Power reset

If the player shuts down while operating, you can turn off and restart the player by pressing RESET button.

## Connecting the computer and data file transmission

Start the computer and then connect the unit with the USB port of the computer using the connection line. The USB cable connection is required for battery recharge and for data transmission. This unit and the computer can be connected using the USB interface, and can be used as a mobile disk. You can easily drag and drop your favorite music into the player with no format conversion.

### Battery

This unit uses a high capacity lithium battery. The duration of battery power depends on volume and the amount of time the display is on. Use power saving modes [user define power off time] or [display setup] to extend battery life.

### Charging

To recharge the battery, connect the player with the computer USB port or the USB charger. If the USB charger is used, the indicator of the charger during charging is red. The battery is fully charged when the indicator of the charger turns green.

#### Using a MINI SD card

After this unit is connected with the computer, you will find two mobile disks. The first is the built-in memory storage for this unit and the other is the MINI SD card. If no card is inserted, the second disk cannot be opened. This unit supports MINI SD cards from 128MB to 4GB.

### Inserting and Removing the MINI SD card

Inserting: Put the MINI SD card face up (side with words) (with the direction of the display screen as the face), and gently press the card into the socket in the unit. Now you can play the content in the MINI card.

Removing: Gently push the MINI SD card and it will eject slightly, then you can take it out.

Caution: To prevent damage to music files on the card and in the unit, please ensure that power is OFF when inserting or removing the MINI SD card!

# **Main Interface**

MP4 provides an intuitive icon based touch screen operating system, which makes navigation a breeze. In the main menu, click on the icons to access the different functions.

After accessing the corresponding function mode, gently press the touch screen. You can see a menu window.

Wait a short time or press 📓 at the upper part of the screen to close the menu window.

Press M button at the lower part of the screen or press in at the bottom of the touch screen to return directly to the main menu.

Long press M button at the lower part of the screen or in the control menu at the upper part of the screen to return to the main menu.

## Music mode

In the main menu, click on "Music" function icon on the touch screen to access the "Music" function interface.

## 1. Description of playing interface

After accessing the "Music" function mode, gently touch the screen to see the "Menu Window".

Touch the "<sup>M</sup>" at the upper part of the "screen menu", and the "Menu Window" will disappear.

Press "M" button at the upper part of the screen or "<sup>11</sup>" button at the bottom of the touch screen to return directly to the "Main Menu".

Built-in speaker on/off control button

Use the music mode setup shortcut button to perform the music playing mode, the loop mode and the EQ mode.

Return directly to the "Main Menu".

Close the button menu display.

Short press the button to go back to the previous track or long press to fast rewind the current music

Access the music list to select the music files

Play/pause the current music

Short press the button to advance to the next track or long press fast forward

### 2. Description of the music list interface

Directly touch the "name of music" on the screen to play the selected music.

Built-in speaker on/off control button
 Return directly to the main menu
 Close the button menu display
 File browse up
 Delete the selected music
 Return to the folder up one level
 File browse down

### 3. Lyric display

The player supports "\*LRC" lyric files (The user can download via "www.lrc.com" website, or acquire lyric files via "LRC") to perform synchronous playing of lyrics and music. Names of lyric and music files must be identical.

Lyrics will automatically be displayed when a lyric file with LRC extension is present in the same folder as a currently playing song file with exactly the same name.

## **Movies playing**

In the main menu, click on the "Movies" icon to access the "Movie" function. In the "Movie" mode, gently press the touch screen to see the menu window. Touch the "<sup>M</sup>" at the upper part of the "screen menu", and the "Menu Window" will disappear.

Press "M" button at the upper part of the screen or """ button at the bottom of the touch screen to return directly to the "Main Menu".

#### 1. Description of movie file list

Directly click on the name of video file on the screen to start playing the selected video.

Built-in speaker on/off control button

Return directly to the main menu

Close the button menu display

File browse up

Delete the selected music file

Return to the folder up one level

File browse down

## **Description of movies playing**

Close button menu display

Return directly to the main menu

Built-in speaker on/off control button

Short press this button to access the previous video and long press for fast rewind of the current video

Access the video list and select the video files

Play/pause the current video

Short press the button to access the next video and long press to fast forward the current video

## FM radio

In the main menu, click on the "Radio" icon on the screen to access the FM radio function.

In the "Radio" mode, gently touch the screen to see the menu window.

Touch the "<sup>1</sup> at the upper part of the "screen menu", to close the "Menu Window".

Press "M" button at the upper part of the screen or """ button at the bottom of the touch screen to return directly to the "Main Menu".

## Games

In the main menu, press "Game" icon on the screen to access the "Game" function.

Long press "M" button at the lower part of the screen to return directly to the main menu. Game rules: When one line is filled with blocks that line will clear, and the blocks above will move downwards. Play continues until unfilled rows of blocks fill to the top of the screen. You earn 100 points for filling 1 line of blocks, 300 points for 2 lines at the same time, 700 points for 3 lines, 1500 points for 4 lines. The speed will accelerate when the points reach 10000.

#### **Game Controls**

### 1. Start

Push the power switch to the "🔄" direction for one second to start the game. Short press "PLAY" button to start/pause.

### 2. How to play games

Press "+/-" button to move the blocks left or right and "M" to rotate blocks.

### 3. Exit

Long press "M" button to quit the game and return to the main menu.

# System setup

In the main menu, press the "System" icon on the screen to access the "System" setup function. This function allows you to set system options such as "music", "Radio", "Record" "Display", "Auto play set", "System", "Power Off time", "Default Set", "Firmware Upgrade", etc.

Press the corresponding function setup icon on the screen to access the corresponding function setup options.

In the "Setup" screen, long press "M" menu button to return to the main menu.

### 1. Music

In this setup, there are 4 options: Repeat Mode, Play Mode, EQ select and user EQ Set.

Press the onscreen " $\square/\square$ " icon buttons to select the setup options. Short touch the selected zone on the screen to access Level 2 menu. In the 4 options, press " $\square/\square$ " icon on the screen to select the corresponding setup, short touch the selected zone on the screen to exit and save the settings. Touch " $\square$ " icon to go up one menu level.

1) Repeat Mode

In this menu, you can choose from these options: single once, repeat single music, folder once, repeat folder, repeat once, repeat all, trial listening.

2) Play Mode

In this menu, select from: Sequence playing, random playing selection.

3) EQ select

In this menu, your options are: normal, 3D, rock, popular, classical, bass, jazz, user define.

4) user EQ Set

In this menu there are five frequencies, with 7 levels of adjustment for each to tailor the sound to your personal taste.

#### 2. Radio

In this setup, there are two options: stereo switch and FM Region.

Touch " $\square$ / $\square$ " icons on the screen to select the set options. Then short press the selected zone on the screen to access Level 2 menu. In the two options, press " $\square$ / $\square$ " icons on the screen to select the corresponding setup. Short touch the selected zone to exit and save the settings. Touch the " $\square$ " icon button to return to go up one menu level. 1) Stereo switch

- Switch FM stereo on or off.
- 2) FM Region

Under this menu: options are: China, Europe, Japan and USA.

#### 3. Record

In this setting, there are two options: REC Quality and REC Volume.

Press " $\square / \square$ " buttons to choose a setup option. Then short touch the selected zone on the screen to access Level 2 menu. In these options, touch " $\square / \square$ " icon button on the

screen to select the corresponding setup and then short touch the selected zone to save the settings and exit. Touch ", icon button to return to go up one menu level.

1) REC quality

In this menu choose from: high quality and common quality.

2) REC volume

In this menu, there are 5 options: +1, +2, +3, +4, +5. The higher the level, the greater volume it records.

### 4. Display

In this setup there are 3 options: backlight time, Lum and backlight Mode.

Touch " $\square$ / $\square$ " icon button to select the setup option. Then short touch the selected zone on the screen to access Level 2 menu. In two options, touch " $\square$ / $\square$ " icon on the screen to select the corresponding setup. Short touch the selected zone on the screen to save settings and exit. Touch " $\square$ " icon button to go up one menu level.

1) Backlight Time

In this menu there are 6 options including: 5 seconds, 10 seconds, 15 seconds, 20 seconds, 30 seconds and long time lighting.

2) Lum

In this menu, there are 5 options including 1, 2, 3, 4 and 5. The higher the level, the brighter the display will be.

3) Backlight Mode

In this menu there are two options to choose from: normal and power efficiency.

#### 5. Auto play set

In this setup there are two options: text and Jpeg.

At this time touch " $\square/\square$ " icon button to select the setup option. Then short touch the selected the zone on the screen to access Level 2 menu. In two options, touch " $\square/\square$ " icon on the screen to select the corresponding setup. Short touch the selected zone on the screen to save settings and exit. Touch " $\square$ " icon button to go up one menu level.

1) Text

In this menu, there are 5 options: 10 seconds, 15 seconds, 20 seconds, 25 seconds and 30 seconds.

2) Jpeg

In this menu, there are 5 options: 1 second, 2 seconds, 3 seconds, 4 seconds and 5

seconds.

## 6. System

In this setup there are 4 options: Language, About, Calibrate and Bee.

Touch (a,b) icon button to select the setup option. Then short touch the selected zone on the screen to access Level 2 menu. In each option, touch (a,b) icon on the screen to select the corresponding setup. Short touch the selected zone on the screen to save settings and exit. Touch (a,b) icon button to go up one menu level.

1) Language

In this menu there are three language options: simplified Chinese, traditional Chinese and English.

2) About

In this menu, you can see remaining storage capacity and system software version number. This information is read only. Short touch the information display zone on the screen and exit.

3) Calibrate

If you find that the touch screen position is not right, you can calibrate the contact buttons using this function.

4) Bee

In this menu, there are two options: On and Off.

	Language	
M	About	
×	Calibrate	
	Bee	

#### 7. Power Off time

In this setup there are 6 options: close, 10 minutes, 15 minutes, 30 minutes, 60 minutes, and 120minutes. Touch " , icon button to select the setup option. Then short touch the selected zone on the screen to access Level 2 menu. In each option, touch " , icon on the screen to select the corresponding setup. Short touch the selected zone on the screen to save settings and exit. Touch " ; icon button to go up one menu level.

#### 8. Default set

Touch "Default Setup" icon on the screen to access the "System recovery default" warning interface. Short touch "OK" button on the screen to restore to the factory default setup. Short touch "Cancel" on the touch screen to cancel.

#### 9. Firmware upgrade

Touch "Firmware Upgrade" icon on the screen to access the "Firmware Upgrade"

warning interface. Connect the player to the computer USB interface to update the firmware for the player. Short touch "Cancel" on the touch screen to cancel.

#### **Producing video files**

The player supports AVI, MPG, MPEG, RMVB, VMV and DAT, formats by converting them to the AVI format using included Video Conversion software. AVI is the most popular video format for the current portable media player as well as one of the most popular formats on the internet.

#### Installing tool software

Put the driver CD included with the unit in the CD drive of your computer. In the Windows Operating System, the installation interface will automatically pop up. Click on "Video Convert Tool V3.X" to start installing all software for MP4 player. Follow the installation prompt to complete the installation process.

#### System requirements

The basic configuration required by the video conversion software is:

CPU: INTEL or AMD; WINDOWS operating system that must be installed with the player in the version of MS MEDIA PLAYER9 or over.

#### Operation steps

1. Click and run the program of "AV Converter.exe", shown as follows:

	400.02114.021		(*)+)3

Note: Firmware upgrade is to improve and optimize the performance of the player. The

player will continue to function normally even if the firmware isn't upgraded. Errors during firmware upgrading could cause the device not to work normally! The firmware upgrade software of this player is not compatible with other MP3/4 players.

#### **Common Troubleshooting**

1. Product will not power on.

Check the battery. If the battery is discharged, please use the provided adaptor to charge the battery and then retry. If the battery is fully drained, a full recharge will take approximately 8 hours. If the product still will not power up, press the "RESET" button on the side of the unit.

2. Buttons do not work.

Check whether the power switch is in the HOLD position. If it is, move it to the normal operating position.

3. No sound.

Check whether the voice is set to "0". If so, change it to your favorite position. Check whether an audio mode is activated (FM, Music, etc.). If no playing mode is selected, there will be no output of sound.

4. Noise while playing.

Damaged music files may cause noise or inconsistent sound output. Check whether the earphone is connected. Make sure the earphone cord is not damaged. Dirt in the earphone jack/terminal can also cause noise.

5. FM radio channels don't work normally

Since there is no separate antenna, the MP4 uses the connected earphone cord to receive FM radio signals. Therefore, reception will be best when the earphone cord is stretched out. The reception sensitivity may differ as the earphone cord is moved.

6. Noise in the recorded files

The MP4 is equipped with a very small microphone. Some noise in voice recordings is normal with very compact microphones.

7. Garbage displayed on the screen

Please check whether proper language option is set up. The language option can be set up in "Settings" – "System Settings" – "Language Settings".

8. Unable to download files

Make sure that the computer and the player are properly connected. Make sure that there is sufficient available memory. Make sure that the USB connection cable is not damaged.
